To control the idle in your Hyundai, you'll need to adjust the throttle cable. Step 1. Open the hood and locate the throttle body. If you are standing at the bumper and looking down on the engine bay, it will be on your left. One one end, the throttle is connected to the fuel rail and engine. On the other end it is connected to the air intake.

Tip: The idle screw almost always has a Phillips head. If you see a nearby flathead screw, this is typically the air intake screw. While turning the air intake screw can be used to adjust the idle speed, this screw also controls the air flow when you're actively riding. As a consequence, it's generally not a good idea to mess with this screw.

~~Simple Ways to Adjust Idle on a Motoreycle: 10 Steps~~

Turn the idle screw, now exposed from the protective rubber coating, in order to adjust the idle. Loosen the screw in a counter-clockwise fashion to increase idle speed or tighten it in a clockwise manner in order to decrease the idle speed. Ideally, you will want the idle to rest at 650 RPM.

~~How to Adjust a Car Idle | It Still Runs~~

Homelite Chainsaw Idle Adjustment Set the idle speed screw by adjusting the screw marked 'T.' If the chainsaw starts and runs without idling, turn the screw clockwise to increase the idle speed. If the chain moves while the chainsaw is idling, turn the screw counterclockwise instead.

~~How do you adjust the idle on a Homelite chainsaw?~~

When input sensors tell the PCM to increase the engine's idle speed, the valve opens in the IAC, increasing air flow. The fuel injectors also open a fraction of a second longer, increasing fuel flow. We increase engine idle speed because additional fuel and air enter the engine.

~~How to adjust idle on atv - YouTube~~

Your carburetor is the heart of your car, this video from Luke Finley (ThunderHead289 on YouTube) explains how to properly adjust idle mix screws on your carb using a vacuum gauge with a hands on demonstration.. Steps. 1. Make sure engine is fully up to operating temperature. 2. Find source of full manifold vacuum (most will use full manifold port for vacuum advance.)

~~How To Properly Adjust Carb Idle Mixture - RacingJunk News~~

The idle circuit is a crucial component to overall street engine operation and properly adjusting the idle mixture goes a long way toward improving throttle response, fuel mileage, and emissions.

~~Setting Idle Mixture The Right Way - Super Chevy~~

To adjust the carburetor on Poulan chainsaws, clean the air filter and the spark arrestor, and adjust the adjustment screws marked T, L and H to set the idle and engine speed. Preferably, have the H and L screws adjusted by a professional.

~~How Do You Adjust the Carburetor on Poulan Chainsaws?~~

Turn the adjustment screw to the right, or clockwise, to increase the engine idle speed. Turn the screw 1/4 turn using the screwdriver and release the throttle trigger to see if the engine will...

~~How to Adjust the Idle on a Weed Eater | Home Guides | SF Gate~~

Check the engine idle speed with a tachometer. For aluminum-block engines, the engine should idle at 1750 RPM. On cast-iron block engines, the idle speed should be 1200 RPM. Adjust the idle adjustment screw slightly to fine-tune the engine to this optimum idle speed.

~~How to Adjust the Idle on a Briggs & Stratton Lawn Mower ...~~

Adjusting the idle on a chainsaw all comes down to the turn of a T-head screw. On right-handed chainsaws, the idle screw tends to be on the left. It's best to check the owner's manual, or do a web search for your make and model, to ensure you've found the proper screw or screws to adjust.

~~How To Troubleshoot And Adjust The Idle On A Chainsaw | Hunker~~

Turn the idle adjustment screw to tighten. Turn the screw clockwise, no more than a half-turn, and listen to the engine. Most owner's manuals will have an optimum speed to set the idle, though you have some wiggle room if you prefer it higher or lower. Consult you owner's manual for the number and consult the tachometer as you adjust.
