In 1911, the Wrights' Vin Fiz was the first airplane to cross the United States. The flight took 84 days, stopping 70 times. It crash-landed so many times that little of its original building materials were still on the plane when it arrived in California. The Vin Fiz was named after a grape soda made by the Armour Packing Company.

History of the Airplane and Flight: Orville and Wilbur Wright

Wilbur won the coin toss, but lost his chance to be the first to fly when he oversteered with the elevator after leaving the launching rail. The flyer, climbed too steeply, stalled, and dove into the sand. The first flight would have to wait on repairs.

Heppenheimer reexamines what Wilbur and Orville Wright achieved. In *First Flight*, he debunks the popular assumption that the Wrights were simple mechanics who succeeded by trial and error, demonstrating instead that they were true engineering geniuses. Heppenheimer presents the background that made possible the work of the Wrights and examines the work of Samuel P. Langley, a serious rival. He places their work within a broad historical context, emphasizing their contributions after 1903 and their convergence with ongoing

Around the World documents the exciting journey of four American planes—the Chicago, Boston, New Orleans, and Seattle—and their crews on a race around the world. The trip held many challenges: extreme weather, tricky navigation, unfamiliar cultures, fragile planes, and few airfields. The world fliers risked their lives for the sake of national pride. Based in part on the journal of one of the crew members, First Lieutenant Leslie Arnold, along with commentary, newspaper reports, and archival images, First Flight Around the World is a captivating tale about American ingenuity, gumption, and perseverance.

One of the most important books in the history of aviation, this volume contains research from between 1891 and 1893 that proved invaluable to the Wright Brothers. 90 illustrations.

The #1 New York Times bestseller from David McCullough, two-time winner of the Pulitzer Prize—the dramatic story-behind-the-story about the courageous brothers who taught the world how to fly—Wilbur and Orville Wright. On a winter day in 1903, in the Outer Banks of North Carolina, two brothers—bicycle mechanics from Dayton, Ohio—changed history. But it would take the world some time to believe that the age of flight had begun, with the first powered machine carrying a pilot. Orville and Wilbur Wright were men of exceptional courage and determination, and of far-ranging intellectual interests and ceaseless curiosity. When they worked together, no problem seemed to be insurmountable. Wilbur was unquestionably a genius. Orville had such mechanical ingenuity as few had ever seen. That they had no more than a public high school education and little money never stopped them in their mission

“enjoyable, fast-paced tale” (The Economist), master historian David McCullough “shows as never before how two Ohio boys from a remarkable family taught the world to fly” (The Washington Post) and “captures the marvel of what the Wrights accomplished” (The Wall Street Journal). He draws on the extensive Wright family papers to profile not only the brothers but their sister, Katharine, without whom things might well have gone differently for them. Essential reading, this is “a story of timeless importance, told with uncommon empathy and fluency...about what might be the most astonishing feat mankind has ever accomplished...The Wright Brothers soars” (The New York Times Book Review).
