Evergreen Plastic Styrene Profiles for model making

Making Model Boats with Styrene by Richard Webb: Richard Webb has enjoyed making and sailing radio controlled model boats for over 25 years. The models he has designed and built have, increased in size and complexity and using his wide experience he has achieved several national awards. When his grandchildren asked for a boat of their own he then went on to design some simple models using flat styrene sheet. The idea of forming a boat hull from flat sheet was adapted from building a full ...

Marine Modelling Magazine (Books) - Model Dockyard

Styrene plastic (more formally known as polystyrene) is one of the primary materials used for scratch-building models today. This plastic is easy to cut and glue, comes in many thicknesses, and is even available in custom shapes and textured panels. First-time modelers are often scared away from scratch-building.

Tips for Modeling With Styrene Plastic

This white styrene sheet is ideal for use in most fields of model making. Can be easily bonded together with the aid of our Plastruct plastic weld (PPW). All sheets are 210mm x 295mm and come in a choice of 5 thicknesses.

There's more than one way to power a toy boat. Electric motors, balloons, gears, water jets, belt drives, chemical reactions, steam, and even gravity can be used to propel a small ship across a pool. Also, the boats' propellers and paddles can be side-mounted or at the stern, or even sit above the waterline, like a fan-powered swamp boat. The Motorboat Book will show children how to build more than 20 different models through step-by-step instructions with clear photos. And if they'd rather travel under the water than over it, the book has 6 different submarine projects. In addition to the boatbuilding activities, author Ed Sobey includes instructions on how to build an "ocean" to test the boats, as well as accessories such as four

different water pumps, waterproof battery and motor cases, and a working foghorn. Most of the boats are built from recycled and easy-to-find materials, but an appendix lists local and online sources for wire, plastic propellers, small motors, and more. Educators will appreciate the Meeting Science Standards summary at the end of the book.

The "Catalog ... directory", forming the October number from 1936 to 1939 was replaced by "Modern plastics catalog" (separately issued) 1941-

This book introduces materials and how advances in materials result in advances in technology and our daily lives. Each chapter covers a particular material, how the material was discovered or invented, when it was first used, how this material has impacted the world, what makes the material important, how it is used today, and future applications. The list of materials covered in this book includes stone, wood, natural fibers, metals, clay, lead, iron, steel, silicon, glass, rubber, composites, polyethylene, rare earth magnet, and alloys.

The Report on Carcinogens (RoC) is a congressionally mandated, science-based, public health document that identifies and discusses agents, substances, mixtures, or exposure circumstances (hereinafter referred to as "substances") that may pose a hazard to human health by virtue of their carcinogenicity. For each listed substance, the report contains a substance profile which provides information on (1) the listing status, (2) cancer studies in humans and animals, (3) studies of genotoxicity (ability to damage genes) and biologic mechanisms, (4) the potential for human exposure to these substances, and (5) Federal regulations to limit exposures. Eight substances have been added to this 12th ed. of the report, which now includes 240 listings. The industrial chemical formaldehyde and a botanical known as aristolochic acids are listed as known human carcinogens. Six other substances captafol, cobalt-tungsten carbide (in powder or hard metal form), certain inhalable glass wool fibers, o-nitrotoluene, riddelliine, and styrene are added as substances that are reasonably anticipated to be human carcinogens. Figures. This is a print on demand report.
