The Crimean War (1853-56) was fought mainly on the Crimean Peninsula between Russia and Britain, France, and the Ottoman Empire. It arose from the conflict of great powers in the Middle East and was more directly caused by Russian demands to exercise protection over the Orthodox subjects of the Ottoman sultan.

The Grand Crimean Central Railway was a military railway built in 1855 during the Crimean War by Great Britain. Its purpose was to supply ammunition and provisions to Allied soldiers engaged in the siege of Sevastopol who were stationed on a plateau between Balaklava and Sevastopol. It also carried the world's first hospital train. The railway was built at cost and without any contract by a partnership of English railway contractors led by Samuel Morton Peto. Within three weeks of the arrival of

FitzRoy James Henry Somerset, 1st Baron Raglan, (born September 30, 1788, Badminton, Gloucestershire, England-died June 28, 1855, near Sevastopol, Crimea, Russia), field marshal, first British commander in chief during the Crimean War. His leadership in the war has usually been criticized.

In contrast to every other book about the conflict Andrew Lambert's ground-breaking study *The Crimean War: British Grand Strategy against Russia, 1853-1856* is neither an operational history of the armies in the Crimea, nor a study of the diplomacy of the conflict. The core concern is with grand strategy, the development and implementation of national policy and strategy. The key concepts are strategic, derived from the works of Carl von Clausewitz and Sir Julian Corbett, and the main focus is on naval, not military operations. This original approach rejected the 'Continentalist' orthodoxy that dominated contemporary writing about the history of war, reflecting an era when British security policy was dominated by Inner German Frontier, the British Army of the Rhine and Air Force Germany. Originally published in 1990 the book appeared just as the Cold War ended; the strategic landscape for Britain began shifting away from the continent, and new commitments were emerging that heralded a return to maritime strategy, as adumbrated in the defence policy papers of the 1990s. With a new introduction that contextualises the 1990 text and situates it in the developing historiography of the Crimean War the new edition makes this essential book available to a new generation of scholars.

In the summer of 1812 Britain stood alone, fighting for her very survival against a vast European Empire. Only the Royal Navy stood between Napoleon's legions and ultimate victory. In that dark hour America saw its chance to challenge British dominance: her troops invaded Canada and American frigates attacked British merchant shipping, the lifeblood of British defence. War polarised America. The south and west wanted land, the north wanted peace and trade. But America had to choose between the oceans and the continent. Within weeks the land invasion had stalled, but American warships and privateers did rather better, and astonished the world by besting the Royal Navy in a series of battles. Then in three titanic single ship actions the challenge was decisively met. British frigates closed with the Chesapeake, the Essex and the President, flagship of American naval ambition. Both sides found new heroes but none could equal Captain Philip Broke, champion of history's greatest frigate battle, when HMS Shannon captured the USS Chesapeake in thirteen blood-soaked minutes. Broke's victory secured British control of the Atlantic, and within a year Washington, D.C. had been taken and burnt by British troops. Andrew Lambert, Laughton Professor of Naval History in the Department of War Studies at King's College London, brings all his mastery of the subject and narrative brilliance to throw new light on a war which until now has been much mythologised, little understood.

Crimea: The Great Crimean War, 1854-1856 by Trevor Royle The Crimean War is one of history's most compelling subjects. It encompassed human suffering, woeful leadership and maladministration on a grand scale. It created a heroic myth out of the disastrous Charge of the Light Brigade and, in Florence Nightingale, it produced one of history's great heroes. New weapons were introduced; trench combat became a fact of daily warfare outside Sebastopol; medical innovation saved countless soldiers' lives that would otherwise have been lost. The war paved the way for the greater conflagration which broke out in 1914 and greatly prefigured the current situation in Eastern Europe.

The true story of how Britain's maritime power helped gain this country unparalleled dominance of the world's economy, Admirals celebrates the rare talents of the men who shaped the most successful fighting force in world history. Told through the lives and battles of eleven of our most remarkable admirals - men such as James II and Robert Blake - Andrew Lambert's book stretches from the Spanish Armada to the Second World War, culminating with the spirit which led Andrew Browne Cunningham famously to declare, when the army feared he would lose too many ships, 'it takes three years to build a ship; it takes three centuries to build a tradition.'

'Fascinating . . . Shot through with fresh insights . . . No previous biography has attempted anything so comprehensive.' Observer Nelson is a thrilling new appraisal of Horatio Nelson, the greatest practitioner of naval command the world has ever seen. It explores the professional, personal, intellectual and practical origins of one man's genius, to understand how the greatest warrior that Britain has ever produced transformed the art of conflict, and enabled his country to survive the challenge of total war and international isolation. In Nelson, Andrew Lambert - described by David Cannadine as 'the outstanding British naval historian of his generation' - is able to offer new insights into the individual quality which led Byron rightly to celebrate Nelson's genius as 'Britannia's God of War'. He demonstrates how Admiral Nelson elevated the business of naval warfare to the level of the sublime. Nelson's unique gift was to take that which other commanders found complex, and reduce it to simplicity. Where his predecessors and opponents saw a particular battle as an end in itself, Nelson was always a step ahead - even in the midst of terrifying, close-quarters action, with officers and men struck down all around him. 'Excellent . . . Worthy of the stirring events [it celebrates].' Independent

Our fascination with the drama of war at sea is as strong today as it was in the heyday of the sailing ship.This book, written by one of the world's foremost authors on naval warfare, describes the dramatic battles of an age when sail was supreme. Andrew Lambert's comprehensive history examines key naval conflicts from the highest strategic level right down to the experience of the ordinary sailor. Fully illustrated throughout, this book incorporates computer-generated cartography that brings the sea battles to life. An in-depth look at ship design and the "floating culture" onboard The Anglo-Dutch Wars of 1650-74, when English commanders challenged Dutch sea power with superior speed, close quarters fighting, and fireships The rise and fall of the French Navy under the Sun King, Louis XIV The Napoleonic Wars, the defeat of the French fleet, and the rise of British Royal Navy hero Admiral Lord Horatio Nelson

From an acclaimed naval historian, Crusoe's Island charts the curious relationship between the British and an island on the other side of the world: Robinson Crusoe, in the South Pacific. The tiny island assumed a remarkable position in British culture, most famously in Daniel Defoe's novel. Andrew Lambert reveals the truth behind the legend of this place, bringing to life the voices of the visiting sailors, scientists and artists, as well as the wonders, tragedy and violence that they encountered.

21st Century Corbett is a collection of essays demonstrating the critical role Sir Julian Corbett played in the development of maritime strategy and sea power theory in the early twentieth century. His close connections with Mahan and Sims helped reinforce the trans-Atlantic axis of education and thinking on sea power. Corbett worked closely with First Sea Lord Admiral John Fisher (1841 1920) to enhance the strategic planning of the Royal Navy, and compiled the official history of the First World War."

The Routledge Handbook of the Crimean War is an edited collection of articles on the various aspects of the Crimean War written by distinguished historians from various countries. Part I focuses on diplomatic, military and regional perspectives. Part II includes contributions on social, cultural and international issues around the war. All contributions are based upon findings of the latest research. While not pretending to be an exhaustive encyclopaedia of this first modern war, the present volume captures the most important topics and the least researched areas in the historiography of the war. The book incorporates new approaches in national historiographies to the war and is intended to be the most up-to-date reference book on the subject. Chapters are devoted to each of the belligerent powers and to other peripheral states that were involved in one way or another in the war. The volume also gives more attention to the Ottoman Empire, which is generally neglected in European books on the war. Both the general public and students of history will find the book useful, balanced and up-to-date.
