There are several terms that are used to describe this Ultimate Reality within the Christian world, including God, Yahweh, Christ and Jehovah; a favorite expression of mine is Transcendent Reality, because it refers to the fact that the nature our Creator "transcends" creation (mass, time and space). The truth is, no matter how much we may claim to know about the Transcendent One, it will always only be a partial and incomplete representation of Him; so as His creatures we can always add ...

Ultimate Reality - The Transformed Soul

Ultimate reality has no claim to a Higher Authority. In the Bible, it says "In the beginning God created the heavens and the earth" (Genesis 1:1). This is the reality of Higher Authority for Christians. Faith is believing in that which is not seen.

My view of ultimate reality - Free Essay Example ...

In Theravada Buddhism, Nirvana is ultimate reality. Nirvana is described in negative terms; it is unconstructed and unconditioned. In some strands of Mahayana Buddhism, the Buddha-nature or the Dhammakaya is seen as ultimate reality. Other strands of Buddhism reject the notion of ultimate reality, regarding any existent as empty of inherent existence ().

Concept of an ultimate being in philosophy In philosophy, the Absolute is the term used for the ultimate or most supreme being, usually conceived as either encompassing "the sum of all being, actual and potential", or otherwise transcending the concept of "being" altogether. While the general concept of a supreme being has been present since ancient times, the exact term "Absolute" was first introduced by Georg Wilhelm Friedrich Hegel, and features prominently in the work of many of his follower

This book is Mr. Cater's follow up work to The Awesome Life Force. It contains countless gems of thought provoking ideas. In this two volume set you will discover an explanation for seemingly unexplainable phenomena. Levitation, missile weight loss in space, pyramid power and a closer look at the properties of light. Joseph Cater points out the fundamental weakness in conventional mathematics. The role of the soft electrons is expanded upon. Magnetic fields and astronomical error in determining planetary sizes and distances are fully explained. Volume 2 carries us into the mystery of the Crystal Skull. Have you ever wondered how from certain rock formations water can be produced? Everything in the process of creation proceeds from the simple to the more complex. If there is a test for the validity of a theory or concept in its ability to be explained Joseph Cater accomplishes it in this set of books. You do not have to be a genius to understand, there is something here for everyone!

THE MOST REVEALING AND EXTRAORDINARY BOOK EVER WRITTEN. IT PROVIDES THE KEY FOR AN ADEQUATE EXPLANATION OF ALL PHENOMENA. EVEN THE LAYMAN CAN FIND MUCH OF GREAT VALUE AND INTEREST IN THIS WORK. IN ADDITION IT PRESENTS SOME OF THE MOST SENSATIONAL AND SHOCKING EXPOSÉS EVER REVEALED TO THE GENERAL PUBLIC. The Existence of God can be a challenging topic when brought up between theists and non-theists. Even so, there is much productive discussion to be had on the subject when people of differing perspectives meet. The Xing (The Crossing) paints a portrait of six different encounters between persons of different professional backgrounds. In these chance meetings, the professionals will present their varying points of view. It seeks to highlight what most will think about, but few are willing to talk about: the question of God's existence. This exploration occurs through a variety of scenarios. A professor, through unforeseen circumstances, meets a mechanic. A lawyer speaks to his client, who is a truck driver. A neurosurgeon talks with his IT, and so on. Throughout their exchanges, a wide range of topics will be brought up. The inspiration for this novel comes from the Book of Job, in which Job debates with his friends over God's involvement in times of suffering, or lack thereof. This novel depicts a series of civil and friendly discussions between persons who do not agree, which is really intended to inspire readers.

This volume investigates Paul Tillich's relationship to Asian religions and locates Tillich in a global religious context. It appreciates Tillich's heritage within the western and eastern religious contexts and explores the possibility of global religious-cultural understanding through the dialogue of Tillich's thought and East-West religious-cultural matrix.

Explores the resources for contemporary ethics found in the work of the Cheng brothers, canonical neo-Confucian philosophers. Yong Huang presents a new way of doing comparative philosophy as he demonstrates the resources for contemporary ethics offered by the Cheng brothers, Cheng Hao (1032–1085) and Cheng Yi (1033–1107), canonical neo-Confucian philosophers. Huang departs from the standard method of Chinese/Western comparison, which tends to interest those already interested in Chinese philosophy. While Western-oriented scholars may be excited to learn about Chinese philosophers who have said things similar to what they or their favored philosophers have to say, they hardly find anything philosophically new from such comparative work. Instead of comparing and contrasting philosophers, each chapter of this book discusses a significant topic in Western moral philosophy, examines the representative views on this topic in the Western tradition, identifies their respective difficulties, and discusses how the Cheng brothers have better things to say on the subject. Topics discussed include why one should be moral, how weakness of will is not possible, whether virtue ethics is self-centered, in what sense the political is also personal, how a moral theory can be of an antitheoretical nature, and whether moral metaphysics is still possible in this postmodern and postmetaphysical age. "This book presents the philosophical ideas of the Cheng brothers intelligently, convincingly, and powerfully. It is among the best books ever written on the Cheng brothers, including works in the Chinese language." — Kam-por Yu, coeditor of *Taking Confucian Ethics Seriously: Contemporary Theories and Applications*

This unprecedented collection of 27,000 quotations is the most comprehensive and carefully researched of its kind, covering all fields of science and mathematics. With this vast compendium you can readily conceptualize and embrace the written images of scientists, laymen, politicians, novelists, playwrights, and poets about humankind's scientific achievements. Approximately 9000 high-quality entries have been added to this new edition to provide a rich selection of quotations for the student, the educator, and the scientist who would like to introduce a presentation with a relevant quotation that provides perspective and historical background on his subject. Gaither's Dictionary of Scientific Quotations, Second Edition, provides the finest reference source of science quotations for all audiences. The new edition adds greater depth to the number of quotations in the various thematic arrangements and also provides new thematic categories.

Of course, death will happen to all of us someday, but until then, it's not something to think about or grapple with. But we do think about it. Arthur C. McGill maintains that our preoccupation with health, good looks, and material success is in fact a retreat from death--which we secretly fear is the final lord of our lives. Charting the Christian pilgrimage toward a life freed from the dominating power of death, McGill uses three scriptural images of Jesus to show us the possibility of walking continually into death, being ourselves, loving our neighbors, and worshiping God.
