so-everyday problems.

Why isn't everyone creative? Why doesn't education foster more ingenuity? Why is expertise often the enemy of innovation? Bestselling creativity expert Michael Michalko shows that in every field of endeavor – from business and science to government, the arts, and even day-to-day life – natural creativity is limited by the prejudices of logic and the structures of accepted categories and concepts. Through step-by-step exercises, illustrated strategies, and inspiring real-world examples, he shows readers how to liberate their thinking and literally expand their imaginations by learning to synthesize dissimilar subjects, think paradoxically, and enlist the help of the subconscious mind. He also reveals the attitudes and approaches that diverse geniuses share – and anyone can emulate. Fascinating and fun, Michalko's strategies facilitate the kind of lightbulb-moment thinking that changes lives – for the better.

Contains idea-triggering questions based on nine principles of creativity (substitute, combine, adapt, magnify or add, modify, put to some other use, eliminate, rearrange, reverse). Designed to stimulate creative thinking about problems and generate new ideas in business or other settings.

From the bestselling author of Thinkertoys, this follow up brings innovative creative thinking techniques within reach, giving you the tools to tackle everyday challenges in new ways. Internationally renowned business creativity expert, Michael Michalko will show you how creative people think—and how to put their secrets to work for you in business and in your personal life. You don't have to be a genius to solve problems like one. Michalko researched and analyzed hundreds of history's greatest thinkers across disciplines—from Leonardo da Vinci to Pablo Picasso—to bring the best of their techniques together and to teach you how to apply them in your own life. Cracking Creativity is filled with exercises and anecdotes that will soon have you looking at problems and seeing many different solutions.

The Idea Agent is a practical idea management handbook, aimed at people who want to take an active role in creative processes across all areas. It combines the creatively wild with the rationally structured techniques for innovation to provide readers with a varied toolbox of proven idea management methodology. From discussing how to identify a problem or opportunity, to describing techniques for idea creation, it offers a step-by-step guide to building creative concepts for the marketplace. With built-in exercises and applications, this book is an ideal working companion for any innovator.

A framework for overcoming the six types of innovation killers Everybody wants innovation—or do they? Creative People Must Be Stopped shows how individuals and organizations sabotage their own best intentions to encourage "outside the box" thinking. It shows that the antidote to this self-defeating behavior is to identify which of the six major types of constraints are hindering innovation: individual, group, organizational, industry-wide, societal, or technological. Once innovators and other leaders understand exactly which constraints are working against them and how to overcome them, they can create conditions that foster innovation instead of stopping it in its tracks. The author's model of constraints on innovation integrates insights from the vast literature on innovation with his own observations of hundreds of organizations. The book is filled with assessments, tools, and real-world examples. The author's research has been featured in the New York Times, Wall Street Journal, London Guardian and San Jose Mercury News, as well as on Fox News and on NPR's Marketplace Includes illustrative examples from leading organizations Offers a practical guide for bringing new ideas to fruition even within a previously rigid organizational culture This book gives people in organizations the conceptual framework and practical information they need to innovate successfully.
