Learn the basics of MATLAB. Language Fundamentals. Syntax, array indexing and manipulation, data types, operators. Data Import and Analysis. Import and export data, including large files; preprocess data, visualize and explore. Mathematics. Linear algebra, differentiation and integrals, Fourier transforms, and other mathematics. Graphics

MATLAB Documentation - MATLAB & Simulink

Hello and welcome back to another MATLAB video. Today, we're going to talk about creating a graphical user interface with GUIDE. This video is probably most appropriate if you're using MATLAB 2015b or earlier. If you are using a newer version, I actually recommend checking out App Designer, which is a new app-building platform in MATLAB.

How to Create a GUI with GUIDE - Video - MATLAB

This shows you how to make a simple GUI in MATLAB. The basics of GUIDE are: Lay out controls of the GUI. Wire up callbacks, the function that runs when you interact with the controls. Gather data from the controls. This series shows these basic skills. They allow you to make a wide array of GUIs very easily.

Introduction to GUI building with GUIDE in MATLAB » Stuart ...

x=-20:0.05:20; y=x.^3+6*x.^2-20; plot (x,y); grid on; The first line simply means that we want the variable x to start at -20 and to end at 20, and it has to increase with a step of 0.05 from its initial value to its final value. If you type the following code in Matlab (without the; at the end) x=-20:0.05:20.
